

# SYNEPSIS DOCXPORT™

INSTALLATION GUIDE

July 2017

V4.0

## INTRODUCTION

DocXport is a tool which allows a user to extract content from a repository, while preserving directory structure, versions, object names and attribute information.

## SYSTEM REQUIREMENTS

The following is the minimum system configuration recommended configuration to run DocXport.

### HARDWARE

Hard Disk Space	RAM
15 MB	1024 MB

### SOFTWARE

- Sun JRE 1.5.0, Sun JRE 1.6.0

- DFC v.4.2.x and up which you can download from EMC's website using your client account:  
<https://emc.subscribenet.com/control/dctm/login?nextURL=%2Fcontrol%2Fdctm%2Findex>

Please refer to the DFC installation and release notes for DFC system requirements and installation procedure

### INSTALLATION WITH DFC 4.X OR 5.X

1. Unzip the **DocXport.zip** file to a program directory (C:\Program Files\DocXport)
2. The following directories/files are now visible:

Name	Date modified	Type	Size
Synopsis-DocXport_v4.0_user_guide.pdf	24/04/2015 4:52 PM	Adobe Acrobat D...	475 KB
Synopsis-DocXport_v4.0_installation guide.pdf	24/04/2015 4:51 PM	Adobe Acrobat D...	127 KB
DocXport EULA.pdf	24/04/2015 4:47 PM	Adobe Acrobat D...	161 KB
docxport.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
docxport_cline.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
docxport-dfc-5.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
launch.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
launch_command_line.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
lib	24/04/2015 4:45 PM	File folder	
config	24/04/2015 4:44 PM	File folder	

3. Copy files **dfc.jar** and **dfcbase.jar** from the Documentum Shared Directory (C:\Program Files\Documentum\Shared) to the **Lib** directory under the DocXport installation directory (C:\Program Files\DocXport\lib.)
4. Edit file **DocXport.cmd**
5. Modify the following parameter:
  - i. DCTM\_CP="C:\Program Files\Documentum\dctm.jar" with the path to the *dctm.jar* file on your local machine.
6. Edit file **launch.cmd**
7. Modify the following parameter:
  - i. javaw -Ddfc.properties.file=C:/Documentum/config/dfc.properties -Xmx1024m -cp %CLASSPATH%;%DCTM\_CP% com.synepsis.docxport.Main with the path to the *dfc.properties* file on your local machine.
8. DocXport is now installed.

## INSTALLATION WITH DFC 6.X

1. Unzip the **DocXport.zip** file to a program directory (C:\Program Files\DocXport)
2. The following directories/files are now visible:

Name	Date modified	Type	Size
 Synepsis-DocXport_v4.0_user_guide.pdf	24/04/2015 4:52 PM	Adobe Acrobat D...	475 KB
 Synepsis-DocXport_v4.0_installation_guide.pdf	24/04/2015 4:51 PM	Adobe Acrobat D...	127 KB
 DocXport EULA.pdf	24/04/2015 4:47 PM	Adobe Acrobat D...	161 KB
 docxport.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
 docxport_cline.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
 docxport-dfc-5.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
 launch.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
 launch_command_line.cmd	22/09/2013 7:44 PM	Windows Comma...	1 KB
 lib	24/04/2015 4:45 PM	File folder	
 config	24/04/2015 4:44 PM	File folder	

3. From the Documentum Shared Directory (C:\Program Files\Documentum\Shared), copy the following files to the **Lib** directory under DocXport installation directory (C:\Program Files\DocXport\lib.)
  - i. dfc.jar
  - ii. aspectjrt.jar
  - iii. certjFIPS.jar
  - iv. jsafeFIPS.jar
  - v. configservice-api.jar
4. Edit file **DocXport.cmd**

5. Modify the following parameter:
  - i. DCTM\_CP="C:\Program Files\Documentum\dctm.jar" with the path to the *dctm.jar* file on your local machine.
6. Edit file ***launch.cmd***
7. Modify the following parameter:
  - i. `javaw -Ddfc.properties.file=C:/Documentum/config/dfc.properties -Xmx1024m -cp %CLASSPATH%;%DCTM_CP% com.synopsis.docxport.Main` with the path to the *dfc.properties* file on your local machine.
8. DocXport is now installed.
